## Last-Minute Changes

- *Windows only:* If you are using QuarkCMS XTensions software, the **Color Management** pop-up menu in the **Color Management Preferences** dialog box has been changed to the **Color Management Active** check box; activate QuarkCMS by checking **Color Management Active**. Because of this change, QuarkCMS for Windows will use the Kodak CMM (Color Management Module); you will not be able to choose a different CMM. (Change to “Color Management Preferences dialog box” and “Color Management pop-up menu” in the “Preferences Commands” section of Chapter 4, “Edit Menu,” in *A Guide to QuarkXPress: Interface Overview*, and to “Setting Color Management Preferences” and “Changing Profiles Before Printing” in the “Using Color Management” section of Chapter 12, “Color,” in *A Guide to QuarkXPress: Using QuarkXPress*.)
- The **Lock Other Layers** command has changed to the **Lock All Layers** command. To lock items on all but the active layer, choose **Lock All Layers** from the context menu and manually unlock the active layer. (Change to “Locking Items on Layers” section of Chapter 15, “Layers,” in *A Guide to QuarkXPress: Using QuarkXPress*.)
- To accommodate printing limitations in browsers, the **Suppress Printout** check box in the **Modify** dialog box (**Item** → **Modify**) is not available in Web documents.
- When creating a rollover in a Web document, you can only select a GIF, JPEG, or PNG file for the rollover image. The default image may be of another file type, but should be changed (in the **Modify** dialog box) to export as a GIF, JPEG, or PNG.
- Due to the implementation of enhanced Reformed German hyphenation, using Reformed German as a paragraph language may cause reflow in QuarkXPress Passport documents. Text in documents that use Reformed German may reflow when opened in previous versions of QuarkXPress Passport, as Reformed German support was not available in previous versions of QuarkXPress Passport. To ensure that text does not reflow, make sure all copies of QuarkXPress Passport have been updated to version 4.1 or later.

For users running German operating systems, the default paragraph language will be German, so existing documents do not reflow. However, if you want to use Reformed German as your default paragraph language, regardless of your **Program Language** setting (**Edit** menu), follow these steps.

  - 1 Close any open documents.
  - 2 Choose **Edit** → **Style Sheets**.
  - 3 Select the **Normal** paragraph style sheet and click **Edit**.
  - 4 In the **Formats** tab, set the **Language** pop-up menu to **German, Reformed**.
  - 5 Click **OK** and then click **Save**.

If your program language is Swiss German, continue to set your program language to Swiss German (**Edit → Program Language**) if you want to use Swiss German keyboard commands. This will still allow you to set the paragraph language to Reformed German so you can use the Reformed German hyphenation rules and dictionary.

## Screen Shots

The screen shots in the documentation were taken in pre-release versions of QuarkXPress or QuarkXPress Passport. The interface shown in the screen shots may vary slightly from the actual interface.

## Compatibility Issues

- Pantone has changed some of their color definitions; as a result, the CMYK components or the on-screen display of certain Pantone colors may be different in QuarkXPress 5.0 than they were in QuarkXPress 4.x.
- *Mac OS*: In the QuarkXPress Help files, a display issue may cause entries to appear twice in the index. However, this does not affect the functionality of the Help file, as double-clicking either entry will display the correct topic.
- *Windows (all versions)*: You must remove any earlier versions of QuarkXPress before installing QuarkXPress 5.0. If earlier versions are not removed and you then use the Windows **Uninstall** feature to remove earlier versions of QuarkXPress, some files will be incorrectly removed and QuarkXPress 5.0 will not operate correctly.

If you install QuarkXPress 5.0 without removing earlier versions of QuarkXPress and then use the Windows **Uninstall** feature, thus causing QuarkXPress 5.0 to operate incorrectly, you can use the **Repair** feature to fix the problem. To use the **Repair** feature, refer to the QuarkXPress for Windows installation instructions.

- *Windows 2000*: Before beginning the installation of the QuarkXPress software, you must be logged on as a power user or administrator. During the installation, when you are asked to specify the user type, you should choose “Anyone who uses this computer.” Otherwise, QuarkXPress will only be available to power users or the administrator. This problem does not affect Windows NT, Windows 95, or Windows 98.

### Learning QuarkXPress

If you have little or no experience with QuarkXPress and QuarkXPress Passport software and you want to begin learning about them, Quark offers training modules to teach you the basic skills necessary to create documents using these applications. Experienced users may also find the lessons useful for learning features that are new to QuarkXPress 5.0, such as layers, tables, and the Web document features. You can find these training modules on the Quark Web site at [www.quark.com/service/learning/quarkxpress](http://www.quark.com/service/learning/quarkxpress).

### Contacting Quark

For information about how to contact Quark, see the “Contacting Quark.pdf” file on the QuarkXPress or QuarkXPress Passport CD-ROM.

If you are unable to access the “Contacting Quark.pdf” file, contact Quark™ Technical Support by phone at (303) 894-8899 between 7:00 a.m. and 5:00 p.m. Mountain Time, Monday through Friday, or go to [www.quark.com](http://www.quark.com).
